

Corrections and Community Supervision

DOCCS FACT SHEET

March 1, 2021

The management and operation of prisons is difficult work. It requires an equal measure of patience, discipline and creativity. DOCCS is responsible for the care, custody, and treatment of individuals sentenced to state prison, working with these inmates to ensure successful re-entry into the community and supervising those who are placed on parole. That's our Department's mission and it's the guide we follow to carry out the very serious responsibility entrusted to us.

The material contained within this Fact Sheet is based on statistical information compiled by DOCCS and it is intended to provide insight into the function and operation of the Department's 52 facilities that house 32,384 inmates and 34,485 parolees under DOCCS' responsibility.

Excludes Willard, Edgecombe and Parole Diversion Programs.

*Includes disciplinary confinement SHU 200 units and Regional Medical Units.

Note: Unlike the Penal Law where physical injury is a required element, any attack by an inmate is classified by DOCCS as an assault. This includes events where no physical injury occurs and events where any object, including a small object, is thrown at and hits another person. By contrast, in the Penal Law, an assault requires physical injury, which means impairment of physical condition or substantial pain.

Note: Excludes Willard, Edgecombe, residential treatment facilities and Parole Diversion Programs and is based upon staff injuries sustained in Unusual Incidents each month, including employee accidents. Effective October 1, 2014 per Article VII bill, DOCCS added a category of severe and redefined injury definitions.

*Injuries that require either no treatment, minimal treatment (scratch, bruise, aches/pain) or precautionary treatment.

** Injuries such as lacerations, concussions, 2nd degree burns, serious sprains, dislocation, and muscle or ligament damage.

***Injuries that require transport to an outside hospital but are not considered life-threatening at the preliminary report.

**** Injuries that cause obvious disfigurement, protracted impairment of health, loss or impairment of organ function, amputation, and injuries that risk cause of death.

Escape Incidents

- The last escape from within a maximum security secure perimeter was 2015 at Clinton Correctional Facility; prior to 2015 the last escape was in 2003.
- The last escape from within a medium security secure perimeter was 1992 at Mid-Orange Correctional Facility.

Prison Closures

- Since 1999, New York's prison population has declined by 54.1 percent, from a high of 72,649 incarcerated individuals (includes Willard DTC) to 32,384 (3/1/21).
- Since 2011, the State has eliminated more than 6,650 prison beds and closed a total of 17 correctional facilities due to excess bed capacity resulting in an overall annual savings of approximately \$193 million.
- DOCCS security staff reductions have been consistent with inmate population declines. In each of the prison closure years, more than 96% of affected employees remained employed, retired or resigned.
