

Department of Corrections and Community Supervision

DOCCS FACT SHEET

February 2026

The management and operation of prisons is difficult work. It requires an equal measure of patience, discipline and creativity. DOCCS is responsible for the care, custody, and treatment of individuals sentenced to state prison, working with these incarcerated individuals (I/Is) to ensure successful re-entry into the community and supervising those who are placed on parole. That's our Department's mission and it's the guide we follow to carry out the very serious responsibility entrusted to us.

The material contained within this Fact Sheet is based on statistical information compiled by DOCCS and it is intended to provide insight into the function and operation of the Department's 42 facilities that house 33,753 incarcerated individuals and the supervision of 17,401 active releasees in New York State. In total, there are 24,666 parolees currently under DOCCS' responsibility, which includes parolees actively reporting in New York and out-of-state, those in the violation process, in absconding status, deported, or locally incarcerated.

Note: Tables are based upon the number of staff injuries sustained in assaults on staff, harassment of staff, assaults on incarcerated individuals, and harassment of incarcerated individuals each month and not the number of incidents. This table represents injuries among DOCCS and OMH staff only; civilians and non-staff individuals involved in incidents are excluded.

*Injuries that require either no treatment, minimal treatment (scratch, bruise, aches/pain) or precautionary treatment.

** Injuries such as lacerations, concussions, 2nd degree burns, serious sprains, dislocation, and muscle or ligament damage.

***Injuries that require transport to an outside hospital but are not considered life-threatening at the preliminary report.

**** Injuries that cause obvious disfigurement, protracted impairment of health, loss or impairment of organ function, amputation, and injuries that risk cause of death.

Escape Incidents

- The last escape from within a maximum-security secure perimeter was 2015 at Clinton Correctional Facility; prior to 2015 the last escape was in 2003.
- The last escape from within a medium security secure perimeter was 1992 at Mid-Orange Correctional Facility.

Prison Closures

- Since 1999, New York's prison population has declined by approximately 54 percent, from a high of 72,649 incarcerated individuals to 33,753 (2/2/26).
- Since 2011, the State has eliminated more than 15,000 prison beds and closed a total of 26 correctional facilities due to excess bed capacity resulting in an overall annual savings of approximately \$492 million.
- DOCCS security staff reductions have been consistent with incarcerated population declines. In each of the prison closure years, more than 96% of affected employees remained employed, retired or resigned.
