NEW YORK STATE | Department of Corrections and Community Supervision

Office of Special Investigations

Quarterly Legislative Report

April 1, 2026 – June 30, 2026

The Harriman State Campus, 1220 Washington Avenue, Albany, NY 12226-2050 I www.doccs.ny.gov

Introduction

In early 2026, Governor Kathy Hochul and the New York State Legislature passed the prison reform omnibus bill, enacting a series of changes to improve safety, security and accountability within New York's prisons. As required by the omnibus bill, the New York State Department of Corrections and Community Supervision (DOCCS), Office of Special Investigations (OSI), will provide data on a quarterly basis concerning OSI's complaints and cases.[1] This report will also highlight notable investigative outcomes from the reporting period to provide context for the statistical data. Appended to this report are data tables that will be referenced throughout this document.

This is the second report for 2026, covering the time frame from April 1, 2026, through June 30, 2026.

Among its public safety mission, DOCCS is responsible for providing a safe, humane, and lawful environment for all incarcerated individuals within a state correctional facility, as well as for visitors, volunteers, releasees to community supervision (parole), and Departmental employees. The primary responsibility of OSI is to vigorously pursue justice through fair, thorough, and impartial investigations and foster accountability, integrity, and safety within the Department.[2]

As of June 30, 2026, the Office of Special Investigations has over 300 members across seven investigative divisions, and one multi-disciplinary division with adjunct functions. The OSI Leadership Team includes a Deputy Commissioner / Chief, an Assistant Commissioner / Assistant Chief, and a Director of Operations. The staffing allocation for the divisions can be found in Table 1. OSI continues to recruit and hire additional investigative staff to expand our capabilities and ensure sufficient resources.

The organizational structure and collaborative approach of OSI results in the detection, prevention and elimination of criminal activity, misconduct, fraud, waste, abuse, corruption, and other improper behavior within the Department, as well as the apprehension and transportation of absconders, escapees, and fugitives.[3] Below is a brief description of each OSI division and their mission.

[1] New York State Governor's Office, *Governor Hochul Signs Landmark Legislation to Improve Safety, Security, and Accountability within New York's Prisons*. December 19, 2025. Governor Hochul Signs Landmark Legislation to Improve Safety, Security and Accountability Within New York's Prisons | Governor Kathy Hochul

[2] Department of Corrections and Community Supervision, Directive 0700, Office of Special Investigations.

[3] Department of Corrections and Community Supervision, Directive 0700, Office of Special Investigations.

OSI Division	Division Mission
• Canine Division	The Canine Division is responsible for deterring, detecting, and interdicting dangerous drugs and electronic contraband; tracking individuals; and otherwise enhancing the safety of all employees, incarcerated individuals, releasees, volunteers, visitors, and others within DOCCS' system.
• Criminal Investigation Division (East / West)	The Criminal Investigations Division (CID) investigates a range of criminal activities, including but not limited to the following: violent acts resulting in serious injury or death, threats of violence, gun trafficking, dangerous drug distribution and possession, biological threats, promoting prison contraband, extortion schemes, aggravated harassment of staff, and criminal organizations engaged in extremist violence or terrorist activities. CID also provides investigative assistance, intelligence, and information to law enforcement agencies and prosecutors' offices.
• Fugitive Investigation Division	The Fugitive Investigations Division (FID) specializes in fugitive investigations, fugitive apprehensions, and safely returning fugitives to New York State. FID apprehends parole absconders who participate in the Department's Supervision Against Violent Engagement (SAVE) program. The fugitive investigations include planning of dynamic high-risk entries within the scope and context of locating and arresting the Department's most dangerous fugitives. FID returns out-of-state incarcerated individuals back to New York who have violated their conditions of release in Community Supervision and assists with the transportation of Strict and Intensive Supervision and Treatment (SIST) cases. FID also handles "cold case" warrants and is responsible for the Department's "Most Wanted" webpage.
• Intake, Training, and Analysis Division	The Intake, Training, and Analysis Division (ITAD) is responsible for the processing and management of OSI complaints and case files; coordinating the training of OSI members; and the strategic analysis of data to identify and prioritize OSI's responses to emerging issues and to reduce risk and provides a tactical, analytical role on major cases to enhance investigations. ITAD is responsible for the oversight of OSI's evidence storage and management. ITAD further assists with OSI's special operations, intelligence collection and analysis, and program development to advance OSI's mission.

- **Investigative Counsel Division** — The Investigative Counsel Division (ICD) consists of licensed attorneys who assist OSI's other divisions with the legal aspects of OSI's investigations, particularly on major and complex investigations, helping to ensure the evidence meets legal and evidentiary standards. Investigative Counsels further review OSI cases to ensure the highest quality review and quality control across OSI's investigations. Investigative Counsels also develop recommendations to improve operations and mitigate risk. The Investigative Counsel Division also provides OSI with other legal analysis and support related to OSI's mission on an as needed basis, including reviewing OSI cases related to litigation in coordination with Counsel's Office.
- **Public Integrity Division (East / West)** — The Public Integrity Division (PID) investigates a range of allegations of misconduct, both criminal and internal policy violations, to ensure the integrity of the Department, the safety of all within the DOCCS system, and the protection of those within the state's correctional facilities, under community supervision, and the public. PID, for example, investigates allegations of physical and sexual abuse of incarcerated individuals by employees; staff misconduct, sexual harassment, and other forms of serious harassment and threatening behavior; unattended deaths of incarcerated individuals in facilities; escape plots; and any other alleged misconduct having a nexus to DOCCS that is not covered by another OSI Division.

I. How the Office of Special Investigations (OSI) Receives Complaints.

The OSI Division responsible for the receipt, review, and appropriate dissemination of complaints or allegations is the Intake, Training, and Analysis Division (ITAD), specifically the Intake Unit within ITAD. There are four main avenues for filing a complaint with OSI: post mail, website submission, email to the Intake Unit, and OSI's complaint hotline. While these are the primary ways to submit complaints or allegations to OSI, there are also inter-departmental referrals, as well as outside agency and partner agency referrals. The Intake Unit may also coordinate complaint review with partner organizations including the State Commission of Corrections (SCOC), the New York State Inspector General (NYSIG), and the Correctional Association of New York (CANY).

During this reporting period, OSI received 8,889 complaints. Detailed information concerning these complaints is in Table 2.

II. Types of Complaints Received and Where are they Referred.

It is the primary responsibility of the Intake Unit, to determine if the complaint, or allegation, falls within the purview of OSI, a correctional facility / community supervision office, or other responsible party, including outside law enforcement.

Allegations of criminal or administrative misconduct are referred to the appropriate investigative division, including but not limited to, serious assault, excessive use of force, contraband smuggling, sexual abuse allegations, unauthorized relationships (UAR) between an employee and an incarcerated individual or releasee, threats of violence, escape plots, and unattended deaths of incarcerated individuals.

The Intake Unit may also receive complaints that are more appropriately handled by a correctional facility or community supervision office. Many of these complaints from incarcerated individuals and parolees fall within the purview of the Department's established grievance program.[4] Examples include issues such as commissary, packages, programming, medical care, time computation, extended curfews, or unjustified GPS monitoring. These types of complaints are sent to facility Superintendents, or Community Supervision Bureau Chiefs for review and appropriate action.

Additional information about the types of complaints OSI received during this reporting period, as well as referral location, can be found in Table 3 and Table 4.

III. OSI Investigations – Case Information

Complaints investigated by OSI are assigned to OSI personnel as a "case." Investigations utilize both traditional and cutting-edge investigative methods to gather the facts surrounding an incident or course of conduct to either hold people accountable for their misconduct or exonerate them. There are fundamental investigative steps taken with each OSI case, however, depending on the type of case, additional factors play a role in whether a compelled interview is conducted, subpoenas are issued, or federally required forms are completed (e.g. SSV-IA, SARI). These investigative steps can influence the length of time a case is open, and ultimately whether OSI can substantiate, unsubstantiate, or unfound the allegation.

Whether a case is substantiated, unsubstantiated, or unfounded is based upon the evidence found by OSI during the investigation. "Substantiated" means an allegation that was investigated was determined to have occurred. An allegation is determined to have occurred based on a preponderance of the evidence standard. "Unfounded" means an allegation that was investigated was determined not to have occurred based on the evidence. "Unsubstantiated" means the investigation produced insufficient evidence to make a final determination as to whether or not the event occurred. During the time period

[4] See Directives 4040 (Incarcerated Grievance Program) and 9402 (Parolee Grievance Program).

from April 1, 2026, through June 30, 2026, OSI substantiated 1,074 cases, unsubstantiated 1,339 cases, and unfounded 547 cases (see Table 9).

From April 1, 2026, through June 30, 2026, OSI opened approximately 3,752 new cases for investigation across the Canine Division (K9D), Criminal Investigation Division (CID), Fugitive Investigations Division (FID), and Public Integrity Division (PID). The majority of the cases are associated with a correctional facility; however, there are cases the investigative divisions may have classified as "Other", which can encompass absconder cases and releasee arrests (see Table 5). For example:

> *In May 2026, OSI began a nine-week detail to apprehend absconders from Community Supervision and Temporary Release, including sex offenders, and violent criminals. The detail resulted in the apprehension of 91 additional absconders, on top of routine case work that was still being conducted. Also, notably, in June 2026, OSI-FID, along with the U.S. Marshals, swiftly apprehended an individual alleged to have fired an assault rifle during a family dispute that struck a child in an adjacent apartment. The subject was arrested, and charged with two-counts of Assault 2nd, two-counts of CPW 3rd, Reckless Endangerment 1st, and 15-counts of Endangering the Welfare of a Child.*

This case serves as an example of the work OSI does in the community in furtherance of public safety, and gun involved violence elimination.

During the second quarter of 2026, the Criminal Investigation Division opened cases mostly attributable to contraband drugs, weapons, and electronic devices. The Public Integrity Division opened cases mostly attributable to alleged staff misconduct and unauthorized relationships. It is not uncommon for a case that originates out of CID for contraband – electronics (i.e., cellular phone), to reveal evidence that necessitates a PID investigation because of staff misconduct, unauthorized relationships between staff and an incarcerated individual, or other administrative or criminal activity contained on the phone. For example:

> *On April 30, 2026, a Correction Officer from Gouverneur CF was arrested and charged with NYSPL 205.25, Promoting Prison Contraband 1st, and NYSPL 195.00, Official Misconduct. The arrest was the result of a lengthy investigation into substantial amounts of contraband drugs, and multiple contraband cellphones being recovered from inside the facility. Forensic examination of at least one of the recovered cellphones found evidence of a Correction Officer allegedly introducing drugs and cellphones. As of this report's publication date, the case is pending court.*

More information about cases involving accused staff members can be found in Table 10.

Arguably as important as the ability to substantiate or unsubstantiate an allegation is the ability to unfound one. When a case is unfounded, it means there is substantial evidence to support the conclusion that the alleged activity did not occur. For example:

On June 14, 2026, an incarcerated individual at Attica CF filed a complaint with OSI that alleged they were sexually assaulted and verbally threated by a Correction Officer and subsequently had a retaliatory false misbehavior report (MBR) submitted. OSI quickly obtained Body Worn Camera (BWC) footage, as well as medical and other facility documents regarding the alleged assault. Review of all available evidence was able to quickly exonerate the Correction Officer regarding the alleged sexual assault and verbal threat. Furthermore, the MBR was found to be accurate and in compliance with Department directive and policy.

The advancements in available video and audio of staff interactions with incarcerated individuals allowed OSI to unfound this particular case as a bad faith allegation.

IV. OSI Case Referrals

The Office of Special Investigations is responsible for conducting investigations, while any administrative action taken involving Department staff, including notices of discipline or administrative leave, is the province of the Department's Bureau of Labor Relations (BLR). A referral to BLR does not always result in disciplinary action, as BLR makes an independent assessment of the matter and determines the appropriate corrective action, ranging from retraining to termination. Information about the number of OSI referrals to BLR can be found in Table 6.

When criminal activity is perpetrated within a correctional facility, the Department and OSI refer cases to external law enforcement entities for potential criminal prosecution. During this reporting period, the Department referred 334 cases for criminal prosecution (see Tables 7 and 8). These referrals encompass the alleged criminal actions of incarcerated individuals, staff, and/or civilians. For example:

On April 6, 2026, OSI was notified of the death of an incarcerated individual at Upstate CF. OSI, along with the state police, interviewed an incarcerated individual who admitted to strangling the decedent. Details from the interview, as well as other evidence, was collected and turned over to the New York State Office of the Attorney General (OAG), and Franklin County District Attorney's Office. On May 28, 2026, the incarcerated individual was indicted for Murder 2nd, Assault 1st, Manslaughter 1st, and Strangulation 1st. As of this report's publication date, the case is pending court.

This case serves as an example of the Department and OSI seeking to hold perpetrators accountable for their criminal misconduct.

Conclusion

The Department and the Office of Special Investigations are committed to addressing and preventing misconduct in all its forms. This report, pursuant to the prison reform omnibus bill,[5] demonstrates through statistics and case examples of the continuous efforts to achieve these goals during the second quarter of 2026. It highlights successes and areas for potential improvement in the future. Commissioner Daniel F. Martuscello III and the Department are committed to transparency and accountability as we continue to improve DOCCS and its ability to provide a safe and dignified correctional environment.

[5] New York State Governor's Office, *Governor Hochul Signs Landmark Legislation to Improve Safety, Security, and Accountability within New York's Prisons*. December 19, 2025. Governor Hochul Signs Landmark Legislation to Improve Safety, Security and Accountability Within New York's Prisons | Governor Kathy Hochul

Table Reference

The Table Reference section of the report is intended to explain the contents of the data tables appended to this report. Please note, the following 12 tables include all 41 open correctional facilities, as well as two closed correctional facilities when applicable: Great Meadow, and Sullivan, both closed in November 2024. Furthermore, there is an "Other" category in the tables that encompasses OSI cases in non-facility locations. These cases predominately involve absconder cases and releasee arrests.

Table 1. Office of Special Investigations Staffing Levels

- The staffing numbers for the Office of Special Investigations (OSI) are current as of the end of this reporting period by Division and by Rank/Title. It also reflects the number of remaining vacancies, and of those vacancies, how many appointments are pending as allotted by OSI's Budget Fill Level (BFL) for this reporting period.

Table 2. Source of Complaints submitted to OSI

- There are several sources by which OSI receives complaints. The largest number of complaints are filed through the OSI hotline which can be reached by incarcerated individuals directly from their tablets or their facility's phone system, as well as by members of the public and employees. The second largest source of complaints submitted to OSI is through a webmail form on the Department's website. OSI also receives complaints from other sources, including but not limited to Suspicious Activity Reports (SAR) that are submitted when tablet messages are flagged as a possible user violation (e.g. potential drug activity). Each of the complaints in the table are categorized numerically by the source from which OSI received the information, and the correctional facility associated with the complaint information. It is important to note that OSI often receives the same complaint from multiple sources, and each source is reflected in the table, regardless of whether it is a duplicative complaint.

Table 3. The Type of Complaint Submitted to OSI

- The proper documentation of the type of complaint OSI receives is foundational to a timely and accurate referral to an OSI investigative division, or referral to the appropriate person or entity. While each complaint is evaluated individually, there are approximately 20 categories that OSI will classify a complaint in. Within each category, there could be multiple sub-categories that address the unique specificity of an allegation or grievance. In most circumstances, a complaint will be associated with multiple sub-categories, and that is numerically reflected in the table. An example would be in the category Facility Conditions / Operations. If a complaint contains allegations of multiple issues that would be within purview of Facility Conditions / Operations (e.g. commissary, law library, or package room) each of those are documented; however, they are classified under a single complaint.

Table 4. Referral Locations for Complaints Submitted to OSI

- The Office of Special Investigations – Intake Unit triages thousands of complaints a month and will refer them to an OSI investigative division for case consideration, as well as to Superintendents and Executive Team members at Correctional Facilities, Bureau Chiefs at Community Supervision, to DOCCS Central Office, or any other

appropriate jurisdictional body. In this reporting period, the OSI Intake Unit referred a number of complaints to the appropriate OSI investigative division and other complaints to the proper correctional facility or other appropriate part of the Department to address. Furthermore, the Office of Special Investigations opens additional cases, particularly within the Fugitive Investigations Division and Canine Division, that are not processed through and referred by the Intake Unit; those cases are self-generated by the division as absconder warrants are received by OSI and canines indicate on people or property, respectively.

Table 5. Number of Cases Assigned to OSI

- During the reporting period, OSI assigned a number of cases across the investigative divisions. While a majority of the cases are associated with a correctional facility, OSI does have cases that are classified as "Other" with respect to the location of the incident / allegation. These are often absconder cases, releasee cases, or cross-jurisdictional investigations. At certain junctures in the investigative process, enough inculpatory evidence may be derived that warrants a referral to the Department's Bureau of Labor Relations (BLR).

Table 6. Number of Referrals to the Bureau of Labor Relations (BLR)

- The adjudication of any disciplinary action within the Department falls within the scope of the BLR, not OSI. Due to the nature of certain investigations where multiple staff members may be alleged to have engaged in conduct that violates the DOCCS Employee's Manual and/or directives, one case may contain multiple individuals being referred for disciplinary review. There are also situations where a referral to BLR is made in tandem with a referral for criminal prosecution.

Table 7 and 8. Number of Referrals for Criminal Prosecution

- When an OSI investigation derives enough inculpatory evidence that appears to meet the standard of proof for a criminal prosecution referral, the respective OSI division will contact the appropriate county district attorney's office and brief the case. Table 7 shows the number of referrals made when the subject of the referral was a staff member, an incarcerated individual/releasee or was a civilian/visitor. Table 8 expounds on the type of case allegation that OSI referred for criminal prosecution by the respective correctional facility where the alleged activity occurred.

Table 9, 10, 11, and 12. Number of OSI Cases Closed and Outcomes

- The preponderance of evidence standard is used to assess if a case can be substantiated, unsubstantiated, or unfounded. OSI investigations are also closed after a two-factor review. Both a Senior Investigator and an Assistant Deputy Chief Investigator review the case and prepare it for closure. Each of these tables shows the number of cases OSI closed during the report period, and further detailed breakdowns of cases that were closed with a disposition that involved subjects who were suspected staff, suspected incarcerated individuals, or suspected visitors / civilians. Please note in Table 10, "Unknown/Unidentified Employee" refers to allegations where the investigation did not yield enough evidence to identify the accused staff member.
